Training Advisory Committee Created

In an effort to promote training and development opportunities to Health Science Center employees and to support policy HR0128, the HR Training Department received approval to form the **Training Advisory Committee (TAC)**. The initial purpose of the TAC is to:

- Investigate training needs on campus;
- Collectively promote and market training opportunities to employees;
- Identify ways to leverage resources in order to maximize training for employees; and
- Develop and propose annual training initiatives for employees on campus and at remote sites.

**Members of the TAC include:**
Darnita Brassel, Training Administrator and TAC Chair – Human Resources
The TAC held its initial meeting in July of 2011. Since that time, a training mission and logo have been developed; and a Training and Professional Development Expo has been planned for Friday, February 17, 2012.

The mission of training at the UT Health Science Center is to strengthen and support the professional and personal growth of its employees. The goal of our training program is to empower employees to gain knowledge and awareness of services, policies, goals and practices. Through training, UTHSC employees enrich their skills, achieve excellence, and add value to the university at many levels.
