

**Family Medicine Residency**  
**Obstetrics II Rotation**

**Rotation Goal**

The overall educational goal for the Obstetrics II curriculum in the Family Medicine residency Program will be that the Resident gain competency in the management and supervision of normal and problem pregnancies.

In the Course of the 3 year program they will have the opportunity to work one on one with a sub-specialty attending as well as a Family Medicine attending with the goal of becoming proficient in the recognition, management and the appropriate triage of both normal and problem obstetrical patients.

Educational Objectives in Obstetrics will include conferences and Didactic programs during the 3 year program. 2<sup>nd</sup> year Rotation: The resident will spend 1 month on the Obstetrical service. Supervising and assisting the first year resident in the management of Obstetrical patients. The resident will have 1 to 2 half days per week in their continuity clinic at the UTFMC. The resident will spend time in OB Chart review and High Risk OB clinic at the UTFMC.

**Supervision**

Supervision is provided by direct observation by attending physician. Attending Physicians include Ruth Baker, M.D. FACOG., Gregg Mitchell, M.D, Scott Sadler M.D., Michael Martin, M. D. and Jeremy Draper, M.D.

**Rotation Objectives**

By the end of the Obstetrics II rotation, PGY II residents are expected to expand and cultivate skills and knowledge learned during previous training and to achieve the following objectives based on the six general competencies. Since competencies mastered in the first year of residency are competencies required for a successful clinician, the second year resident will demonstrate achieved objectives in year one with expanded knowledge, more efficiency in performance of procedures, and additional knowledge in pathophysiology encompassing more complex disorders. The resident should exhibit an increasing level of responsibility and independency as he or she progresses throughout the year.

Competency	Required Skill(s)	Teaching Method(s)	Formative Evaluation Method(s)	Frequency of Evaluation
Patient Care	<b>SPECIALTY SPECIFIC OBJECTIVES</b>			
	Perform an adequate history and physical examination of the Obstetrical patient	Conferences/Didactics Grand Rounds Patient Assessment Case Presentations	Direct Feedback Global Evaluation Procedure Certification 360 Degree Evaluation	Daily Monthly Monthly Monthly
	Implement a rational plan of care for Obstetrical patients which include specialty consultations (OB/GYN or MFM), diagnostic testing, initiation of antepartum testing or medications	Conferences/Didactics Grand Rounds Patient Assessment Case Presentations	Direct Feedback Global Evaluation Procedure Certification 360 Degree Evaluation	Daily Monthly Monthly Monthly
	Provide compassionate and appropriate and effective care	Conferences/Didactics	Direct Feedback	Daily

	of the Obstetrical patient with normal and problem pregnancies while integrating evidence base medicine and local community standards of care, as well as nationally defined quality care standards and the integration of specialty recommendations upon consultation.
