UTHSC Faculty and Friends Honored at Health Care Heroes Awards Competition

Three University of Tennessee Health Science Center faculty members were honored in September as award recipients for the Health Care Heroes Awards competition, sponsored by the Memphis Business Journal. Seven others affiliated with UTHSC were honored as finalists.

University Distinguished Professor Emeritus John W. (Bill) Runyan, Jr., MD, was honored with the Lifetime Achievement Award. A native Memphian, Dr. Runyan joined the UT faculty in 1960. As a result of his commitment to patients with chronic disease, he established a county-wide network of neighborhood health clinics that made primary care and chronic disease care accessible and affordable to those who might not otherwise have access to such care. His nationally recognized nurse-run, physician-backed, and community-based system was one of the first reorganizations of health care delivery that demonstrated a reduction in morbidity and mortality in the population.

Professor of Pediatrics and Chief of the Division of Endocrinology and Metabolism for Le Bonheur Children’s Medical Center, George Burghen, MD, was the recipient of the Health Care Provider – Physician Award. According to the Memphis Business Journal, Dr. Burghen is responsible for encouraging legislation on tighter restrictions on vending machines in Tennessee’s school cafeterias, located in a state with one of the highest child obesity rates in the nation. Dr. Burghen treats patients at LeBonheur’s Lifestyle Clinic, where he heads a team which has developed an easy-to-use program for pediatricians to work with patients and families to reverse childhood obesity and set children on a healthier course.

Soloway Chair of Excellence in Urology, Mitch Steiner, MD, was presented with the award for Health Care Innovations. Dr. Steiner is founder and vice chairman/CEO for GTX, Inc. The Men’s Health Biotech Company. Dr. Steiner’s contributions to treating prostate cancer and other men’s health conditions have been at the heart of inspiring the idea of commercializing home grown technology in Memphis, as well as an inspiration for the area’s biotech industry.

Other UTHSC faculty and/or affiliates who were Healthcare Heroes finalists

Lifetime Achievement Category
Jerre Minor Freeman, MD
Ophthalmologist, Memphis Eye & Cataract Associates
Marcus J. Stewart, MD
Orthopaedic Surgeon, Campbell Clinic
Robert R. Waller, MD
Former President and CEO, Mayo Clinic

Health Care Provider – Physician
Dennis R. Schaberg, MD
Professor and Chair of the Department of Medicine
Andy Spooner, MD
Director of General Pediatrics and Buckman Associate Professor of Pediatrics

Health Care Innovations
Duane Miller, PhD
Chair, Department of Pharmaceutical Sciences and Van Vleet Professor

Community Outreach
Phyllis Richey, PhD
Assistant professor of Preventive Medicine

Mission Statement
The mission of The University of Tennessee Health Science Center is to improve human health through education, research and public service, with an emphasis on improving the health of Tennesseans.

The Record is published by the office of communications and marketing bi-monthly. The edition published on the first of each month is printed in hard copy. The mid-month edition is published online at www.utmem.edu/record.

Campus Moves
The Office of Equity and Diversity has moved to the 920 Madison Building, Suite 420.

The Office of Research Administration has moved to the 910 Madison Building, Suite 823.

College of Nursing Receives Health Workforce Development Grant

The College of Nursing at the University of Tennessee Health Science Center is one of 11 nursing schools statewide selected by the Center for Health Workforce Development in Tennessee to share “Promise of Nursing” grants totaling $244,000.

In addition to the UT Health Science Center, the grants are earmarked for faculty development at Belmont University School of Nursing, Chattanooga State Technical Community College, Columbia State Community College, East Tennessee State University College of Nursing, Jackson State Community College, Lincoln Memorial University, Milligan College Area of Nursing, Motlow State Community College, Roane State Community College, and Vanderbilt University School of Nursing.

The Promise of Nursing for Tennessee nursing schools grant program is administered by the Foundation of the National Student Nurses’ Association. Funds for the program were contributed by 25 Tennessee hospitals and healthcare agencies, Johnson & Johnson, and national companies with an interest in supporting nursing education.

Among the different ways the colleges will utilize the grants are faculty continuing education, mentoring programs, technology education, innovative curriculum development, fast-track nursing curriculum design, and other programs that prepare Tennessee’s nursing schools to better meet the demand for nursing graduates.

The Promise of Nursing for Tennessee program was created to help Tennessee overcome a shortage of registered nurses that was recently cited as the most severe among 16 southern states by the Southern Regional Education Board.

The UTHSC College of Nursing is partnering with Methodist Healthcare and LeMoyne-Owen College to encourage individuals to pursue nursing as a career. The bachelor’s degree in nursing has been re-established at UTHSC, with the first class beginning in July 2005.

Tarnowski Family Scholar and Bucovaz Scholar Named

The College of Graduate Health Sciences recently held a luncheon to announce the inaugural recipients of the Tarnowski Family Scholarship and the Edsel T. Bucovaz Scholarship.

Pictured, from left to right, are, Jeri Bryant, Bucovaz Scholar; Pat Ryan, PhD, associate professor in the Department of Molecular Sciences and Integrated Program director; and Ashley Williams, Tarnowski Family Scholar.
Since 1969, David Johnson, a power plant operator in the Facilities Department, has devoted his time to helping others throughout the country recover from disastrous situations, ranging from local emergencies to tragedies impacting thousands of people.

After the September 11 terrorist attacks on the World Trade Center, Johnson spent two weeks in New York working 12 to 14 hour days in staffing for mass care, which provides shelter, food and supplies to those in need. He coordinated the efforts of nearly 2,000 people.

“After September 11, so many people were angry at what happened that we had volunteers from all over the world come to help,” said Johnson.

In the wake of Hurricane Charlie, which wreaked havoc on the Gulf Coast in August, the Red Cross sent Johnson to Arcadia, Florida, where he was a kitchen coordinator for 20 days, with only one day off. Because it is in a low-lying county, Arcadia was particularly susceptible to tornadoes after the storm, with nearly every building sustaining structural damage and power loss.

He says the most gratifying part of the job is being able to see his work have a direct influence in people’s lives, especially during difficult times.

“In mass care, you deal with the public, unlike in an area like logistics, where you might be in a warehouse. You get immediate gratification by seeing where your efforts are going. You see people being fed and having a temporary place to stay. They are so grateful,” said Johnson.

Though he has seen monumental disasters, Johnson doesn’t single out his work on any one occasion as being most meaningful. He commented, “I don’t think any one’s more important than another. Even a fire at a single-family home is a disaster to that family.”

Donna K. Hathaway, PhD, dean of the University of Tennessee Health Science Center College of Nursing, has been appointed as a member of the Nursing Science: Adults and Older Adults Study Section of the Center for Scientific Review through June 30, 2008.

Members are selected on the basis of their demonstrated competence and achievement in their scientific discipline as evidenced by the quality of research accomplishments, publications in scientific journals, and other significant scientific activities, achievements and honors.

According to the center’s acting director, Brent Stanfield, PhD, study sections review grant applications submitted to the National Institutes of Health, make recommendations on these applications to the appropriate NIH national advisory council or board and survey the status of research in their fields of science.

This month, John N. Fain, PhD, Van Vleet Professor of Biochemistry in the Department of Molecular Sciences, will have a book he edited, “Sanctified Trial: The Diary of Eliza Rhea Anderson Fain, a Confederate Woman in East Tennessee,” published by the UT Press.

Eliza Fain kept a diary from the time of her marriage to Richard Gammon Fain in 1833 to the time of her death in 1892. The book is a collection of those entries that recall the violent conflicts around her Rogersville, Tenn., family farm during the Civil War. The book also reveals Eliza Fain’s deep feelings toward religion, which motivated much of her devotion to the causes of that time. However, the entries may be most revealing as a slice-of-life look at how a mother and wife managed a household of eight while the bloody Civil War raged all around her.

Eliza Rhea Anderson Fain was a distant relative of John N. Fain.

---

**Health Care Interpreter Training**

Are you fluent in Spanish and English, as well as interested in becoming a trained interpreter in a healthcare setting?

The Health Care Interpreter Training curriculum is designed to develop linguistically and culturally competent interpreters who can function effectively and efficiently in health care settings.

**When:** January 11 through April 12, 2005

5:30 to 8 p.m.

**Location:** a hospital in the medical district to be determined.

**Tuition:** $1,050

(May be payable by employer)

**More information**

(901) 763-2045 or (901) 545-7263.

The UTHSC Community Thanks All Those Whose Efforts Made the Employee Appreciation Night and The American Heart Walk Great Successes

UTHSC faculty, staff and students gathered inside AutoZone Park before participating in the American Heart Walk through downtown Memphis.

UTHSC employees enjoyed fun with family and friends at Libertyland during Employee Appreciation Night.

College of Medicine Dean’s Symposium October 29

The Third Annual University of Tennessee Dean’s Symposium will be held from 3 to 5 p.m. on Friday, October 29 at the Central Library at 3030 Poplar Avenue.

Sponsored by the College of Medicine Dean’s Faculty Advisory Committee, the symposium will feature two UTHSC faculty members, Lester Van Middlesworth, MD, PhD, and James Dale, MD.

Professor Emeritus of Physiology and Medicine, Dr. Van Middlesworth will be speaking on “Unexpected Results: Serendipity in Thyroid Research.” Dr. Van Middlesworth is a world-recognized thyroid scientist whose original radiiodine fallout studies are part of the Nuclear Test Ban Treaty display at the Smithsonian National Museum. Two years ago a collaborative effort with other members of the physiology department led to new findings on the effects of radiation. His most recent research was in the areas of hyper/hypo-thyroidism in pregnancy.

Dr. Dale will speak on “Group A Streptococcal Vaccines: After 40 Years, How Close are We?” He is the chief of the Division of Infectious Diseases in the UT Department of Medicine and associate chief of staff for education at the VA Medical Center. Dr. Dale recently published significant results of a phase 1 clinical trial, possibly bringing him within five years of a vaccine against group A streptococci, which are common germs responsible for illnesses such as strep throat and rheumatic fever.

The College of Medicine has designated this symposium as continuing medical education activity for one credit.

The symposium will conclude with a reception. More information may be obtained by contacting Elaine Beard at (901) 448-8220.

21st Annual Forum on Child Health “First Years Last a Lifetime: Tracing the Roots of Violence”

Sponsored by the Children’s Foundation of Memphis in conjunction with the University of Tennessee Health Science Center, the 21st annual Forum on Child Health will be held from 8 to 11:45 a.m. on Thursday, October 14 in the auditorium at LeBonheur Children’s Medical Center.

Titled “First Years Last a Lifetime: Tracing the Roots of Violence,” this year’s event will address how environment and the nurturing provided for children can have a powerful impact on a child’s developmental potential. Case studies will be presented on why children commit violent behavior, followed by discussion on how youth violence that interrupts our daily lives can become an issue of national security and terrorism.

Program highlights include:
8 a.m. - Registration and Continental Breakfast
8:30 a.m. - Welcome and Session Introduction by Russell W. Chesney, MD and Henry G. Herrod, MD, UTHSC; “Commitment to Early Childhood,” by Shelby County Mayor A C Wharton
8:45 a.m. - “Ghosts from Nursery: Tracing the Roots of Violence,” by Robin Karr-Morse, author and therapist

9:45 a.m. - Q & A Session
10 a.m. - Break
10:15 a.m. - “Consequences of Early Childhood Development on Criminal Behavior,” Robert L. Hutton, JD, Glankler Brown, PLLC
10:45 a.m. - Q & A Session
11 a.m. - “Early Childhood Brain Development Effects on Violence in our Community and Nation,” Congressman Harold E. Ford, Jr.
11:30 a.m. - Q & A Session
11:45 a.m. - Adjournment

The Forum on Child Health was established in 1983 through a generous gift by the Crippled Children’s Foundation. In 2001 the foundation’s name was changed to the Children’s Foundation of Memphis. The forum has become one of the largest pediatric seminars in the city addressing the most current topics relating to children’s health.

The registration deadline is Friday, October 8, and the cost is $10 per person. Checks should be payable to UT Health Science Center, and registrations should be mailed to: UTHSC Forum on Child Health, 62 South Dunlap, Suite 500, Memphis, Tennessee 38163. More information may be obtained by calling 448-7218 or 800-733-0482.

The UTHSC Community Thanks All Those Whose Efforts Made the Employee Appreciation Night and The American Heart Walk Great Successes

Stephen Sexton, DDS, Oral & Maxillofacial Surgery
Jennifer Smith, College of Nursing
Jason Thomas, Preventive Medicine
David Tichansky, MD, Surgery-General
Kimberly Womback, MD, Family Practice-Tipton

Computer Security Tips

Lisa Aitken, director of customer technology support for the UT Health Science Center, shares the following information she received from the Sept. 8 issue of an on-line newsletter published by the SANS Institute, the largest source for information security training and certification in the world. The SANS (SysAdmin, Audit, Network, Security) Institute website can be accessed at http://www.sans.org/aboutsans.php if you’re interested in updates.

Aitken pulled the information from their “Report on Identity Theft and Attacks on Computer Users” that she felt would be beneficial based upon frequently asked questions she receives.

Major threats this month

Phishing attacks that seem to come from Citibank, Paypal, Citizens Bank and US Bank are increasing.

In a phishing attack, the thieves pretend to be sending you to a reputable site like Citibank and ask for your private data, so they can steal your money or your identity. Recent research reports that one in twenty people are fooled by these types of attacks, which is why the thieves keep at it.

Also this month, graphical spam is increasing. Spammers send you a picture of the offer instead of the text of the offer, so that your company or internet provider’s spam blockers are powerless to stop them even if they use very bad language.

To be safe

1. DON’T open e-mail attachments from anyone unless you know the sender and you were expecting the attachment.

2. DON’T click on links in e-mails or web sites unless you can guarantee the e-mail came from someone who is not trying to fool you and that the web site is actually the site you think it is.

3. DON’T disclose private information unless you initiated the need to do so.

Also be Aware

Beware of e-mails from people trying to get you to divulge private details. These are often trying to steal your identity (and your money) with titles like:

1. Maintenance Update (from Citibank)
2. PayPal account limited
3. Citizens Bank Fraud Verification Process
4. Citibank with various subjects and possibly a time stamp
5. Attn: Citibank Update

Also, be careful when opening attachments that have interesting subjects and provocative text in the body of the e-mail. Several viruses (Beagle, MyDoom, Netsky) are still spreading rapidly because they fool you into thinking they come from a friend and have data you want to see. Remember: do not open unexpected attachments without checking with the sender to be sure the attachment is safe. If you break this rule, you will hurt a lot of other people - people you know - because your infected computer will send viruses to people in your address book.

For more information like this go to: www.sans.org and click on Electronic Newsletters.

Health Services Research Day

Wednesday, October 13
Coleman Building

8 to 9 a.m. - Pitman Lecture: David Helms, PhD, president and chief executive officer of AcademyHealth speaking on “Translating Research Results into Policy,” North Auditorium

8 to 11 a.m. - Poster Session, lobby and halls of Coleman’s first floor

9 to 9:30 a.m. - Reception, outside of North Auditorium

9:30 to 11 a.m. - Breakout Sessions:
- “Communicating with the Media,” A-132-134
- “Communicating with Policy Makers,” A-138-140 (distance ed classroom)
- “Communicating with Health Care Providers/ Implementing Change,” G-316

11 a.m. to noon - Buffet luncheon, where faculty, staff and student awards will be announced for the poster session, lobby and halls of Coleman’s first floor.

For more information, contact: Teresa Waters, PhD, organizing committee chair at twaters@utmem.edu
Wednesday, Nov. 3
Coleman North Auditorium

Topics and Speakers

8 a.m.
“Mechanisms of Hypertension and Renal Disease in the Metabolic/Obesity Syndrome,” Medicine Grand Rounds.”
Dr. John E. Hall, Professor and Chairman, Department of Physiology & Biophysics, University of Mississippi Medical Center, Jackson, Mississippi

9:00 a.m.
“Endothelial Gap Junctions, Connexins, and Vascular Tone: Possible Roles in Hypertension.”
Leonard Share Distinguished Visiting Professor, Dr. Brian R. Duling, Professor, Department of Molecular Physiology and Biophysics, The Cardiovascular Research Center, University of Virginia Health Science Center, Charlottesville, Va.

10:15 a.m.
“Integration of Sympathetic Neural Control and Pro-inflammatory Mediators in Hypertension.”
Dr. R. Clinton Webb, Greenblatt Professor and Chairman, Department of Physiology, Medical College of Georgia, Augusta, Georgia

11:15 a.m.
“Obesity, Diabetes and Hypertension in Youth: The New Epidemic.”
Dr. Pedro Velasquez, Assistant Professor, Department of Pediatrics, Le Bonheur Children’s Medical Center, UTHSC

More information: 448-7088

Reminder to Staff that Ex-Employees are Visitors

From time to time, ex-employees will visit the UT Health Science Center patient providers, for example, to pick up personal belongings, a paycheck, or to see a current employee. Because ex-employees are familiar with our organization, our operations and our staff, they represent a higher security and privacy risk to our protected health information (PHI) than do other visitors.

It is each staff member’s responsibility to protect the privacy and security of PHI and to comply with the university’s policies and procedures regarding PHI. When an ex-employee visits our organization, the ex-employee must be treated like any other visitor. Ex-employees should not be allowed in any area with access to PHI. You should communicate this requirement to an ex-employee in a professional and courteous manner.

If for any reason an ex-employee is uncooperative, you should immediately contact your supervisor.

Receiving Complaints

The billing compliance/patient privacy officer of the University of Tennessee Health Science Center is responsible for receiving and investigating all complaints regarding the university’s policies for billing and patient privacy compliance. Complaints can be provided by the following ways:

- Call the Hotline numbers: 448-4900 or 448-1700
- Access the compliance website, www.utmem.edu/compliance to complete a complaint form and forward to cmoffitt@utmem.edu
- Advise your supervisor of the complaint by completing the form provided at www.utmem.edu/compliance.

No Intimidation, Retaliation, or Request to Waive Rights

Employees, patients, and visitors have a right to file complaints with the Billing Compliance/Patient Privacy Officer and with the government. Employees of the university must act cooperatively with patients who wish to file a complaint. The university cannot intimidate, threaten, coerce or take any retaliatory acts against the patient for filing a complaint with the university or with the government. The university cannot treat patients who file complaints differently than other patients. The university cannot ask patients to waive their right to complain to the government or the university. The university also cannot retaliate against other individuals (including employees) for participating in the complaint (for example, the university cannot discipline or terminate an employee for cooperating in an investigation).

The university must take complaints regarding privacy practices of alleged violations by the university’s business associates. The billing compliance/patient privacy officer must investigate all such complaints.
The UTHSC Temporary Help Pool is now operational and ready to assist you with hiring short-term employees at the most reasonable rates.

We work with hiring supervisors to understand their departmental needs and effectively hire the best-suited candidate. You tell us your needs, and we work as quickly as possible to find you the best candidate for the job. Our employees are screened, well-trained and ready to work. We handle all the paperwork including employment, parking, payroll and disciplinary action if needed.

If you need a temp for your office area, please contact Linda Jackson at 448-2784, or you can e-mail your request to ljackson@utmem.edu. Your e-mail should include a brief description of the job assignment, the length of employment, skills required and account to be billed.

---

**Minutes/Policies**

**FACULTY SENATE**
**June 8, 2004**

**Approval of Minutes:** The minutes of April 26, 2004 were approved without corrections or revisions. These minutes will be sent to *The Record* for publication and Senator Shook for publication on the Senate webpage.

**Announcements and Correspondence:** President Malik announced that Cindy Russell was resigning as chair of the IT committee and asked senators to send him suggestions for a new chair. There will be a meeting of the IT committee on Friday, and all senators are invited to attend.

The Faculty Senate will be reviewing and revising the bylaws this summer. Senator Nutting will chair the Bylaws Committee. The first meeting is scheduled for June 24. Another committee from the Faculty Senate will be revising the Faculty Handbook, but it has not been completely constituted yet.

Information on the procedure for nominations for honorary degrees has been sent to the colleges, indicating that deans need to make nominations for committee members. Responses have been received from all colleges except the colleges of Dentistry and Health Science Engineering.

President Malik stated that at the last FSEC meeting, all senators were put on a committee. The committee chair will be contacting the new members.

**Committee Reports:**

A. **Budget and Benefits:** Senator Cashion is on vacation. A report will be given at the next Faculty Senate meeting.

B. **Educational Policy:** Senator Suttle stated the Educational Policy Committee met last Tuesday, and Brian Bennyworth reported on the program COMPUTE, a multimedia program to be used throughout the website for interdisciplinary education.

C. **Faculty Affairs Committee:** Senator Bhattacharya briefly discussed the annual evaluation of UT faculty members, which is supposed to be concluded by the end of June each year before appointment letters are signed. The UT Board of Trustees approved new rules on faculty evaluation in June 2003. It was felt that there should be a better mechanism for letting the faculty know how the rules had changed. There was some concern that the evaluation process had still not begun in some departments, suggesting that the process could not be completed by the required date. Questions were also raised concerning the new 4-point scale that replaces the former 5-point scale. It was decided that this matter should be discussed with the administration.

D. **Faculty Communications Committee:** Senator Nutting reported the following: In the June 1st issue of *The Record* there is a list all of the major listserves. The Faculty list serve is an unmoderated list and hasn’t been used much, so far. A faculty member, not a secretary, must send messages for this list.

In the April 1 issue of *The Record* it shows how you can reach and change your e-mail address in the system. Some e-mail addresses need to be corrected to utmem.edu from tennessee.edu. These are supposed to be linked but they are not. Another issue is whether all employees will have to have a UT e-mail address.

Plans are being made to have the IT CIO or deputy CIO meet with the senate. The new IT officer is only part time, which is felt to be a problem.

E. **Faculty Research Committee:** No report.

F. **IT Committee.** There has been a report by a consultant on UTHSC Internet security, which indicated security is poor and gave a number of recommendations, as well as a price for fixing the problem. This process has been put on hold by UTK. Knoxville indicates that they have established a committee to “work with the other campuses in an advisory capacity.” Questions were raised regarding the continuing computer security problems on the UTHSC campus and the reallocation of the funds that were originally earmarked for finding a solution to these problems. Issues with regard to HIPPA are not currently being addressed by UTK.

G. **Legislative Resource Group:** Senator Hartig reported that several people have been added to the group. One or two meetings will be scheduled with legislators this year, one in January in Memphis and one in March in Nashville. The group is working with Odell Horton on plans for these meetings.
**October 2004**

5. **“Genetic Studies of New Epilepsy Mutations and Models in Mice”**  
   Dr. Wayne Frankel  
   Noon, Link Auditorium  
   More info: bjsmith@utmem.edu

6. **“Gender, Health and Socioeconomic Status”**  
   Dr. Diane S. Shinberg  
   Noon, 66 Pauline Bldg. 1st Floor Conference Room  
   More info: jmcclarin@utmem.edu

7. **Library Workshop**  
   “Accessing Medical Literature”  
   Noon, Library Electronic Classroom  
   More info: http://library.utmem.edu

8. **“Studying the In Vivo Function of Rho Family GTPases in Mice”**  
   Dr. Yi Zheng  
   12:30 p.m., Link Auditorium  
   More info: jfountain@utmem.edu

9. **“Learning from and Preparing for SARS”**  
   Dr. James G. Young  
   8 a.m., GEB A304  
   More info: jtidwel@utmem.edu

10. **Interdisciplinary Leadership Training**  
    “Psychiatric Disorders and Mental Retardation: Behavioral Therapy”  
    Various Speakers  
    8:30 a.m. - 12:30 p.m., Boling Center  
    More info: ljones41@utmem.edu

11. **“TITAN: Critical Incident Stress Management”**  
    Dr. Lawrence A. Edwards  
    11:30, GEB A304  
    More info: jtidwel@utmem.edu

12. **UTHSC Film Festival/Chancellor’s Hours**  
    Stanley  
    12:05 p.m., SAC Larry Dining Room

13. **“Mechanisms of CNS Development and Repair: Neurotrophins, Transcription and Stem Cells”**  
    Dr. Mark Jacquin  
    Noon, Link Auditorium  
    More info: bjsmith@utmem.edu

14. **21st Annual Forum on Child Health**  
    “Fist Years Last a Lifetime: Tracing the Roots of Violence”  
    Various Speakers  
    8:45 - 11:45 a.m., Le Bonheur Auditorium  
    More info: 448-7218 or 800-733-0482

15. **Second Annual Mid-South Fall Cancer Symposium**  
    Dr. Mohammad Jahanzeb, course director  
    8 a.m. – 4:30 p.m., Madison Hotel, 70 Madison Ave.  
    More info: 448-5547

16. **“From DNA Microarray to Gene Function: Application of siRNA in Neuroscience”**  
    Dr. Yiai Tong  
    Noon, Link Auditorium  
    More info: bjsmith@utmem.edu

17. **“Management of HIV & AIDS in the Correctional Setting: Early Identification & Newer Testing Strategies”**  
    Various Speakers  
    11:30 a.m. - 2:30 p.m., TBA  
    More info: jtidwel@utmem.edu

18. **Pharmacology Seminar Title TBA**  
    Dr. Alan Frazer  
    12:30 p.m., Link Auditorium  
    More info: jtidwel@utmem.edu

19. **Interdisciplinary Leadership Training**  
    “Psychiatric Disorders and Mental Retardation: Diagnosis, Medications, Genetics, and Behavioral Phenotypes”  
    Various Speakers  
    8:30 a.m. - 12:30 p.m., Boling Center  
    More info: ljones41@utmem.edu

20. **“TITAN: Hospital Disaster Response Plans-Roles and Functions”**  
    Janet Rowe-Eikenberry  
    11:30 a.m., GEB A304  
    More info: jtidwel@utmem.edu

21. **Library Workshop**  
    “Personal Digital Assistants (PDA)”  
    Noon, Library Electronic Classroom  
    More info: http://library.utmem.edu

22. **“Unexpected Results: Serendipity in Thyroid Research”**  
    Dr. Lester Van Middlesworth  
    3 - 5 p.m., Central Library, 3030 Poplar Ave.  
    More info: ftylavsky@utmem.edu
