Baptist Hospital Imploded - Nov. 6

The old Baptist Hospital was imploded at 6:45 a.m. on Sunday, Nov. 6, to make way for construction of the UT-Baptist Research Park.

The research park will consist of 1.2 million square feet of laboratory, research, education and business development space located on 10-acres in the heart of the Memphis Medical District.

The new campus will integrate research, teaching and biomedical development.

In preparation for the implosion, the Memphis Police Department secured the area by closing a number of city streets and allowing only essential personnel in designated UTHSC buildings. Exterior walls of several university buildings were draped with heavy plastic to reduce the impact of dust and debris.

Because of the huge dust cloud created by the implosion, individuals were kept a safe distance away from the site.

UTHSC faculty, staff and students gathered to watch the implosion at the university’s official celebration location in the United Wholesale Florist parking lot at the corner of Linden and Dunlap.

The implosion of the 924,000-square-foot tower was part of the Memphis Bioworks Foundation’s second phase of demolition.

The first phase consisted of the removal of the four-story Service building in January of this year. The eight-story Interns’ Residence and the 10-story Physicians and Surgeons buildings were then imploded in May.

The clean-up process is expected to be finished in about 11 months. The construction of the research park is expected to take ten years, and will be completed in six phases.

Herrod Steps Down as Dean to Pursue Other Passions

After serving as dean of the College of Medicine for over seven years, Hank Herrod, MD, left the position on Oct. 31 to more closely pursue his true professional loves — treating patients, educating students and coordinating healthcare entities to better serve the community.

He will remain a professor in the Department of Pediatrics and will work with the Urban Child Institute of Memphis to align synergistic efforts in pediatric research within the area. One of the first programs the institute will undertake is to enroll 500 infants in a program that will track their development with extensive data over a five-year period.

“I have been incredibly lucky in my professional life because every few years I have been able to do something new and exciting,” said Dr. Herrod.

Since joining the faculty in 1978 after training as a pediatric immunologist, Dr. Herrod has consistently been dedicated to educating future doctors. Dr. Herrod is particularly proud of advances in the college that have come about during his tenure. One such advancement is the curriculum, which has been updated to contemporary standards and expanded to be more patient-centered with the inclusion of the STEEEP (safety, timeliness, efficient care, effective care, equitable care and patient-centered care) principles. In his ongoing role, he will serve students and patients in an effort to help UTHSC produce the most well-rounded physicians.

Hershel “Pat” Wall, MD, professor and associate dean for admissions and student affairs, will serve as interim dean. Recent restructuring of the college has called for an executive dean over the Memphis, Chattanooga and Knoxville campuses, as well as a dean for each location. Once the executive dean position is filled, the search for permanent deans will begin.
Test Your Knowledge

Questions

1. When may a covered entity disclose a patient’s health information to family members and close personal friends?
   a. Family members and close personal friends may always be told.
   b. Only with the patient’s consent.
   c. Only family members may be told.
   d. None of the above.

2. How may a privacy complaint be filed at the University of Tennessee Health Science Center?
   a. Call the Compliance Hotline telephone number 448-4900
   b. Call the Privacy Hotline telephone number at 448-1700
   c. Call Carolyn Moffitt, Compliance/Privacy Officer at 448-1672
   d. Access www.utmem.edu/compliance to acquire a complaint form for completion and mail to Carolyn Moffitt, Compliance/Privacy Officer, 920 Madison Ave., Suite 807, Memphis, TN 38163
   e. All of the above

Answers

1. None of the above

   To make disclosures to family members and friends, the covered entity must give patients the opportunity to object to the disclosure unless:
   • The entity can infer from the circumstances that the patient does not object, such as when the patient asks questions of the provider with the friend or family member present.
   • The entity determines in the exercise of its professional judgment that it is in the best interests of the patient for the entity to make disclosure of information that is directly relevant to the person’s involvement with the patient’s care (e.g. the patient is not there to object).
   • The entity may not disclose information to a family member or friend if the patient objects.

   The entity can disclose patient information in connection with trying to locate or notify family members or others involved in the patient’s care concerning the patient’s location, condition or death.

2. All of the above

   Anyone filing a complaint may do so without fear of retaliation. Confidentiality regarding the issues identified will be protected up to the limits of the law.

   UTHSC is obligated under the law to report felonious violations of the law if material facts of evidence are provided that constitute a criminal violation of the law. Reported items will be investigated, and appropriate action will be taken. Disciplinary action, up to and including termination, will be administered when evidence supports improper disclosure of protected health information.
Ronald I. Shorr, MD, MS, associate professor in the Department of Preventive Medicine, and Patricia M. Flynn, MD, MS, professor in the Department of Infectious Diseases at St. Jude Children’s Research Hospital, were recently awarded a five-year $1.5 million National Institutes of Health (NIH) grant.

Generated by the UTHSC Department of Preventive Medicine, the grant will focus on improving and expanding multidisciplinary clinical research, training, and mentoring new clinical investigators. The ultimate goal is to establish a clinical research track that will enhance the current Master of Science in Epidemiology program (MSE).

Tommie Norris, DNSc, assistant professor in acute and chronic nursing, had an article titled “Personal Access to Health Care: A Concept Analysis” accepted for publication in Public Health Nursing.

Gabor Tigyi, MD, PhD, professor of physiology, was one of two foreign keynote speakers at Tokyo University’s 21st Century Symposium: “Drug Discovery and Chemical Biology” on Tuesday, Nov. 1.

Dr. Tigyi’s talk featured drug discovery research he conducted with Duane Miller, professor and chair of pharmaceutical sciences, Daniel Baker, PhD, assistant professor in the College of Medicine, and Abby Parrill, PhD, with the University of Memphis.

Dominic M. Desiderio, PhD, professor in the Department of Neurology, was invited to present “The Nitroproteome of the Human Pituitary” on Monday, Oct. 24, at Chiesi Pharmaceuticals in Parma, Italy. He also made this presentation at the Vrije University in Amsterdam, The Netherlands, on Wednesday, Oct. 26.

Thomas Singarella, PhD, professor, chair and director of the Health Sciences Library and Biocommunications Center, is the new chair for the Consortium of Southern Biomedical Libraries (CONBL) on Oct. 22.

CONBL is a professional organization made up of biomedical library directors from seven states with the purpose of exchanging information and sharing existing services. The organization is currently exploring joint licensing of shared electronic resources.

Monica Jablonski, PhD, associate professor of ophthalmology, has had six articles published during 2005. Articles were highlighted in Molecular Vision, Vision Neuroscience, Neuron Glia Biology, American Journal of Medicine Genetics, and Age.

“The Tennessee Mouse Genome Consortium: Identification of Ocular Mutants” and “An ENU-Induced Mutation in Rs1h Causes Disruption of Retinal Structure and Function” are just two examples of articles she had published.

James C. Fleming, MD, FACS, professor of ophthalmology, received the Senior Honor Award from the American Academy of Ophthalmology during its annual meeting on October 14-18.

Dianna Johnson, PhD, professor of ophthalmology, recently served as chair of the National Eye Institute (NEI) Special Emphasis Panel ZRG1 study section. She will also serve as a member of the NEI Special Emphasis Panel for Core Grants scheduled in December.

Lakita Cavin, PhD, assistant professor in the Department of Pharmacology, has been awarded a nearly $600,000 National Institutes of Health, National Cancer Institute grant to study the role of various genes involved in liver cancer.

Dr. Cavin commented, “The aim of our study is to determine the role and function of the genes that are activated during liver tumor progression. Once determined, we can facilitate the development of drugs which can target these genes and treat liver cancer.”

Wendy Likes, DNSc, assistant professor in acute and chronic nursing, has had a case study on management of AGUS pap smears accepted by the Journal of Lower Genital Tract Disease for its fall journal.

Dr. Likes also had the abstract “A Pilot Study: Sexual Function and Quality of Life Following Vulvar Excision” accepted by the International Society for the Study of Vulvovaginal Disease. The oral presentation will occur at the World Congress in February 2006.

Mona Wicks, PhD, RN, professor in the College of Nursing, was invited to make a presentation on breast cancer awareness and early detection to kick off the Shelby County Government’s Breast Cancer Awareness event on Tuesday, Oct. 4.
Kathy Smith, LPN, was named “Employee of the Year” at the UT Family Practice. She was honored with this designation in September. Presenters of the award describe Kathy as a “hardworking employee, who is well respected by our staff.”

Susan Jacob, PhD, executive associate dean in the College of Nursing, was recently appointed to the board of the Tennessee Center for Nursing and to the nominating committee of the Commission on Collegiate Nursing Education. Dr. Jacob also was elected secretary for the Tennessee Nurses Association.

Frances Tylavsky, DrPH, associate professor in the Department of Preventive Medicine, had an article titled “Effects of Calcium, Dairy Product, and Vitamin D Supplementation on Bone Mass Accrual and Body Composition in 10 to 12-year-old girls: a 2-year Randomized Trial” accepted for publication in the November issue of the American Journal of Clinical Nutrition.

Barbara Cherry, a doctoral nursing student, coauthored “Managing Resources and Ensuring Accountability: Understanding Return on Investment in Nursing Leadership Forum” volume 9, number 4, which was published during this past summer.

On Memoriam

The UTHSC community extends condolences to:

Darlene Metcalf, an employee in the Department of Preventive Medicine, on the loss of her mother, Ms. Verna Fulwiley, last month.
Insurance Enrollment, Transfer
Deadline Set for Nov. 15

It’s that time of year again when everyone should be reviewing current insurance coverage options and making any changes for 2006. By now employees should have received a packet of information for the medical plan they are currently enrolled in and a 2006 Medical Options Comparison.

During the next two weeks employees may:
• Transfer health coverage, if currently enrolled.
• Add, cancel or transfer dental options.
• Apply for optional term or universal life coverage.
• Apply to increase optional term or universal life coverage, if eligible.

The deadline for making any annual enrollment change is Tuesday, Nov. 15. For enrollment or change forms contact the Campus Insurance Office in the Hyman Building, room 120, or call 448-5577.

Library Surveys Produce Feedback and Results

In 2001 and 2002, the library conducted surveys of faculty, students, walk-in patrons and interlibrary loan users. Almost 700 people responded, and the feedback proved to be very useful in identifying areas of strength and weakness in library services and collections.

The most common requests were for more electronic journals and databases. Since the survey was conducted, the library has increased its electronic journal collection from 500 to 1,900 titles. SciFinder Scholar, ScienceDirect, MD Consult and Scopus are among the databases purchased. Many respondents requested improvements to self-service photocopying facilities and library computers. The library responded by refurbishing the Copicard machine, and purchasing new photocopiers. Workstations are replaced regularly, and the library now has eight laptops available for checkout to registered library patrons.

Library administrators and staff members have taken their patrons’ comments seriously and have worked hard to make improvements based on their recommendations.

Patrons will soon have another formal opportunity to share their thoughts on library services; look for survey announcements later this month. Take the time to complete the survey to let the library know where it is doing well and what could be improved. This input will help to shape library policy over the coming years.

UTHSC United Way Campaign Going Strong

UTHSC is well on its way to exceeding last year’s gift to United Way because employees have already pledged $54,730 to the campus campaign. Last year the Health Science Center raised $72,500 to benefit the Memphis area.

The campaign continues to run through November, so employees still have time to give. The College of Allied Health Sciences is leading the way at 59.65 percent in total employee participation.

All employees who submit their pledge forms with a donation by Thursday, Dec. 1, will be entered into a drawing to win one roundtrip ticket to anywhere in the continental U.S. Northwest teamed up with United Way to provided this prize. The winner will be announced at the annual Campus Holiday Celebration on Wednesday, Dec. 21.

The coach class airline ticket must be used before December 31, 2006, and restrictions apply.

All employees are encouraged to give to the United Way, which supports over 115 non-profit organizations. Donations can be made through payroll deduction or through a one-time cash or check gift.

Gifts can be designated to a specific United Way agency. The American Red Cross, Salvation Army, Youth Villages, YWCA and Memphis Literacy Council are just a few of the programs that need assistance for their ongoing efforts.

Visit the UTHSC campus website at www.utmem.edu/unitedway or contact an area representative to find out more about contributing to the UTHSC United Way Campaign.

Do You have Questions about Conducting Research at UTHSC?

Whether you are a new or seasoned researcher at UTHSC, you may have questions such as:
Where can I have DNA sequenced on campus? Or, how can I spice up my grant application?

Informational seminars, hosted by the Research Core Facility during December and January, will help answer these and many more questions. Check future issues of The Record for the dates of these seminars.

Impressions Program to Host High School Students

The College of Dentistry’s chapter of the Student National Dental Association will hold its first “Impressions” program on Thursday, Nov. 10.

The “Impressions” program is designed to increase the number of applications and acceptances of minority and underserved students into dental school. The first “Impressions” program will consist of 50 high school students from East High School. For more information, contact Dr. Waletha Wasson at 448-6380.
2005 Employee Service Recognition and Lichterman Employee of the Year Award Reception Scheduled

The 2005 Employee Service Recognition Program and Thomas C. Lichterman Employee of the Year Award reception will be held on Monday, Dec. 5, at 5:30 p.m. The event will take place at the Student Alumni Center inside the O.D. Larry Dining Room.

The Health Science Center will honor employees with 25, 30, 35, 40, 45 and 50 years of service to the University of Tennessee.

To honor the memory of Tommy Lichterman and in celebration of his dedicated and enthusiastic service to the UT Health Science Center, Tommy’s family and friends have established the Thomas Connell Lichterman Employee of the Year Award.

This award is presented annually to a non-exempt employee who demonstrates the high standards and positive characteristics exemplified by Tommy.

The awardee represents the commitment to excellence reflected throughout the university and will be presented a plaque along with a $1,500 check.

Thomas “Tommy” Connell Lichterman, (Oct. 14, 1944 – April 3, 1986), was a messenger at UTMG and UTHSC for 11 years.

In addition to the love he gave his parents, two sisters, four brothers and his dog, Brownie, he brought love and sunshine to the lives of everyone he met and knew at UT. Known as the “Federal Express” of the UT Health Science Center, Tommy refused to be limited by health problems, reaching beyond his job description in achieving excellence. Always proud of his service to UTHSC and UTMG, Tommy serves as an inspiration to all who knew him.

The following employees are being recognized for 25, 30, 35, 40, 45 and 50 years of service with The University of Tennessee:

University of Tennessee President John D. Petersen recently solicited campuses across the system for fiscal year 2007 federal project proposals. These are special projects proposed to the United States Congress for consideration in the fiscal year 2007 budget. If approved, the funds would be available in late 2007. Each campus may submit four projects for the President’s consideration. He has emphasized the importance of strategic partnerships, and collaborative projects will be given the highest consideration.

The federal appropriations cycle does not mirror the Health Science Center’s current strategy/priority development. Therefore, after consulting with the Chancellor’s Advisory Cabinet, the health science center leadership has decided that this year the campus will further advance the fiscal year 2006 project areas — the University of Tennessee Cancer Institute, Health Disparities, Biodefense and the Hamilton Eye Institute. Amanda Goetze, director of federal relations, will work with leaders from each priority area to create a proposal in tune with the current federal climate.

After campus strategy development is completed and an implementation plan is determined, the health science center will be better positioned to identify additional projects that reflect campus priorities for consideration in the fiscal 2008 funding cycle. In preparation for determining future priorities, federal request forms can be completed by those who are interested in pursuing future congressionally mandated funding. The form can be found on the UTHSC website under “Quick Links.” Please submit suggested proposals to Amanda Goetze, agoetze@utmem.edu, by Friday, December 9.

“Although this year’s projects are already identified, it is important for campus leadership to be aware of additional interests within the university,” said Goetze. “As request forms are reviewed, I can identify possible project synergies with congressional interests,” Goetze continued. “Funding opportunities sometimes do present themselves throughout the year, and this coordination will aid our federal relations efforts in these cases.”

A report on the fiscal year 2007 campus priority list is expected later this month, and status reports will be provided throughout the appropriations process.

Please take time to review the updated Legislative and Governmental Contacts Policy, which is printed below and is also available on the UTHSC website under “Administrative Policies.” Compliance with this policy is key to the Health Science Center’s success in speaking with a coordinated voice.

Thank you for your partnership as we promote excellence in scientific scholarship and compassion and skill in clinical care at our state’s flagship healthcare, research and educational institution.

The University of Tennessee Health Science Center

LEGISLATIVE AND GOVERNMENTAL CONTACTS

Effective Date: 11/01/2005

At the Health Science Center the Director of Federal Relations and Director of State and Local Relations serve as the official liaisons for all contacts with elected or appointed officials and/or lobbyists.

Faculty or staff who are contacted by elected or appointed officials or lobbyists or their staff should consult with the appropriate Director as promptly as possible and prior to providing a response.

Administrators, faculty or staff who have proposals or arguments they desire to have presented to the Legislature or to lobbyists must coordinate such approaches with the appropriate director prior to making contact with any legislative or lobbyist offices. Additionally, faculty or staff desiring to invite any legislator or elected or appointed official to campus or to a Health Science Center event must coordinate this effort with the appropriate director prior to extending an invitation.

It is the responsibility of the Director of Federal Relations and the Director of State and Local Relations to assure involvement of the Chancellor; to assure appropriate coordination with the Vice President for Public and Governmental Relations and the University Directors of Federal and State Relations; and to assure any other appropriate approvals are obtained.

Faculty and Staff who desire to express a personal opinion on legislation, political, societal, etc, issues may do so as an individual citizen without coordination through Health Science Center officials. Such employees, however, do not have the right to use University title, affiliations, or letterhead to express a personal opinion since this could be misconstrued to represent the University’s position on an issue.

---

*Latino Immigrant and Migrant Health*
Janine Jurkowski, PhD, MPH; Bobbi Ryder, CEO of National Center of Farmworker Health
8-9 a.m., Coleman Building A-140
More info: jtidwel8@utmem.edu

*Regulation of Intestinal Vitamin Absorption*
Dr. Hamid M. Said, University of Califorina-Irvine
3:30-4:30 p.m., 516 Nash Building
More info: dnutting@physio1.utmem.edu

*Scopus Science Citation Database*
Lisa Layton, Scopus trainer; Elsevier
11-Noon, GEB B-107
More info: utlibrary@utmem.edu or call 448-5404

*Title TBA*
Duane D. Miller, PhD, professor and chair, UTHSC Department of Pharmaceutical Sciences
4 p.m., Link Auditorium
More info: rhori@utmem.edu

*“It’s All in the Timing: Identification of a Transcriptional Clock Controlling Post-Mitotic Differentiation of Neurons”*
Daniel L. Kilpatrick, PhD, University of Massachusetts
12:30 p.m., Link Auditorium
More info: jfountain@utmem.edu

*Evolving Ideas About Sickle Cell Disease: Old Wine, New Skins?*
Medicine Grand Rounds
Raymond Osarogiagbon, MD, FACP
8 a.m., Coleman North Auditorium
More info: bedman@utmem.edu
