

**UTHSC - General Surgery Clinical Rotation G&O**

**Sponsoring Institution: LeBonheur Children’s Hospital    Site: LB            Rotations: Pediatric Surgery    PGY 4**

By the end of the General Surgery rotation at LB, PGY-4 residents are expected to achieve the following objectives based on the six general competencies. The resident should exhibit an increasing level of responsibility and independency as he or she progresses throughout the year. Since competencies learned or mastered in the first three years of residency are competencies required for a successful surgeon, the fourth year resident will demonstrate achieved objectives in previous years with expanded knowledge, more efficiency in performance of procedures, and additional knowledge in pathophysiology encompassing more complex disorders.
