**University of Tennessee Health Science Center**  
**Memphis, Tennessee**

We are seeking a clinician-investigator with a passion for patient-centered research to join a growing and dynamic team of faculty in the Center for Health System Improvement. The Center leads the region-wide Diabetes Wellness and Prevention Coalition Registry and works in collaboration with major health systems and community health centers throughout the Mid-South to improve care for vulnerable populations.

The clinician-investigator will care for patients, train and supervise clinical trainees and health policy and outcomes research PhD candidates, and conduct pragmatic clinical and health services research. Candidates should have a strong interest in one or more of these areas: patient-centered outcomes research; health services; quality improvement; comparative effectiveness; health care delivery; health information technology; disparities; and improving care for patients with obesity, diabetes, or other chronic diseases.

This full-time faculty position is available at the assistant, associate, or full professor level with a tenure-track option. The appointment will be in The University of Tennessee Health Science Center, College of Medicine, Division of General Internal Medicine. Successful candidates will hold an M.D. with an additional M.P.H., Ph.D., or equivalent degree; demonstrated scientific accomplishment; excellent oral and written communication skills; and an ability to acquire sustained, external, investigator-initiated funding. Preference will be given to applicants who have conducted scholarly work in health services and/or pragmatic clinical research with practical implications for clinical practice and/or population health, and to candidates who can lead multidisciplinary research teams to develop and test interventions to improve health systems serving vulnerable populations.

Confidential review of materials will begin immediately and will continue until the appointment is made.

Submit letters of nomination, applications (with a letter of interest, a complete CV, and a list of three references), or inquiries to: Dr. Jim Bailey, Professor & Director, Center for Health System Improvement, College of Medicine, University of Tennessee Health Science Center, 956 Court Avenue, Memphis, TN 38163; phone: 901-448-2475; email: jeb@uthsc.edu or chsi@uthsc.edu.
