## OVERVIEW

The University of Tennessee Health Science Center (UTHSC) Methodist University Hospital Transplant Institute's fifth annual Current Perspectives in Hepatology – Emerging Topics in Liver Disease highlights our commitment to improving the health of our patients and the dissemination of medical knowledge to our community. This one-day symposium features national and local speakers with expertise in liver disease. Topics will be presented to address the individual knowledge gaps and will include current diagnosis, skills, and methodologies within the practice environment.

## EDUCATIONAL OBJECTIVES

- Diagnose and develop a treatment strategy for viral hepatitis in non-academic practices
- Appropriate recognition of drug induced liver disease
- Enhanced knowledge of treatments for fatty liver disease, cholestatic liver diseases, inflammatory bowel diseases
- Describe the role of gut microbiome in liver disease
- Advancements in non-invasive diagnosis of HCC and liver fibrosis

## DESIRED OUTCOME

This symposium is designed to provide interactive educational activities that discuss complicated case scenarios that have been shown to improve participant application of evidence-based medicine for patients with various liver diseases. Providing a format for adult learning that includes lectures, case-based studies, interactive question and answer sessions, collaborative sharing of patient care issues, and networking with other healthcare professionals has shown to improve participant knowledge and competency.
