

## UTHSC GME Immunization Requirements

The University of Tennessee uses Verified Credentials (Qualified First) to manage immunization documentation. Listed below are the immunizations that you will be required to upload to their system and have checked off before you can begin your training. All doses are required before submission (no partial series).

Please ensure you get your documentation from your current medical school or hospital before you complete as it is your personal financial responsibility to secure these immunizations or titers before you can start your training. If you need titers or immunizations, you can make an appointment with your PCP, local health department, or at University Health Services by calling 901.448.5630. Below you will find the documentation required for each immunization for Verified Credentials to check you off.

Verified Credentials GME Code **DDFX-33997**  
<http://scholar.verifiedcredentials.com/uthsc>

Verified Credentials Client Services **1-800-938-6090**  
Immunization Approval Due 5/19/2022
